

paper

PLEASE RECYCLE YOUR PAPER

At Home – At Work – At School

Paper is a remarkable material.

- It is first made from trees.
- Trees are a renewable natural resource. We can plant new trees.
- Paper can be recycled over and over again without using trees.
- Recycling paper keeps trees in place to clean our air. Trees naturally remove carbon dioxide and other pollutants from the air we breathe and give us fresh Oxygen.

PAPER RECYCLING

Newspapers
